### **Letter of Recognition**

Thank you so much for your presentation on 31st July, 2020 to our team.

We are extremely pleased to recognise your efforts in making our roads safer proposing a customized AI software for streamlining road traffic. It's indeed a commendable initiative and we support your mission to bring AI-based technologies into the Indian mainstream. Your software once duly selected, customized and successfully implemented will open up multiple avenues for application and implementation in Police. It's really exciting to see that the youth of India is using advancing technologies to fulfill the smart city goal of the Government of India. I laud you and your team for taking such strides in helping achieve this goal. The project is extremely innovative and a revolutionary step towards helping India become more and more efficient using the power of technology.

We welcome you to participate in the technology selection process exemplifying your excellent work and would love to work with your organisation in taking this initiative forward to make Policing emerging technology driven and efficient.

Best regards,
